

FIRE-PROTECTION
CURTAIN DOORS

MARC-OK

Flexible, curtain fire doors MARC-Ok are designed for separating fire zones in different types of industrial premises.

The curtain door is great for underground parkings and shopping malls, where every inch of usable area counts and minimum dimensions are of value.

The curtain material is wound on a shaft and held open with a fuse lock or an electric drive brake. In the event of a fire hazard, the lock/brake opens, the curtain unfolds and locks off the zone.

WORTH TO CHOOSE WHEN:

1

Wide areas need to be protected

MARC-OK gates can be up to 16 000 mm wide. They do not require additional columns for installation, making the design process easier and freer.

2

Free space needs to be saved

MARC-OK the gate is mounted above the opening, leaving free walls that can be used for other solutions, and more free parking spaces in the underground car parks..

3

You need a "clean" design

MARC-OK fire gates are a good choice when the projected spaces must remain unoccupied. These gates do not take up much space and are noticeable.

SPECIFICATION

MAXIMUM DIMENSIONS 16 000 x 10 000 mm

THICKNESS AND WEIGHT 9mm - 6kg/m² (EI60); 18mm - 9kg/m² (EI120)

FILLING Patented multilayer fiberglass fabric reinforced with steel wire
